PINECONE
SWISS

Compact Commercial Grinder

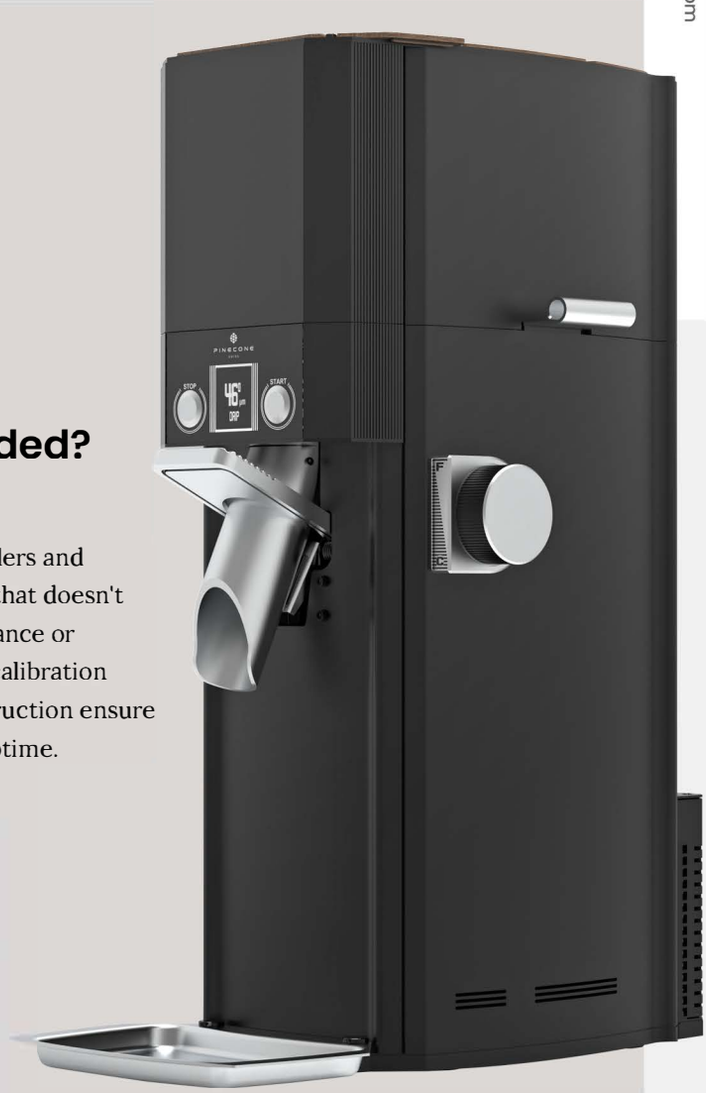

Siberian

www.pineconeswiss.com

The Siberian is the first grinder in the market that reaches over 2.5 kg / 5 lbs per minute and fits onto compact counterspaces.

120 mm flat discs coupled to a heat-free brushless motor enable commercial loads without requiring industrial power supply or large equipment.

Tight counterspace but high output needed? Siberian is here.

An ideal choice for roasters, wholesalers and retailers looking for a sleek solution that doesn't compromise on heavy-duty performance or grinding range. Digital micrometric calibration "by-wire" and modular service construction ensure easy usability and high equipment uptime.

Target application	Coffee shops, self-service and high-volume commercial use
